ILFOCHROME (CIBACHROME) PRINTING

PRICE LIST

JANUARY 2006

Prints are made from 35mm to 8x10 transparencies on the glossy surface ILFOCHROME CLASSIC print material. Special effects and multiple images are individually estimated. Some images may require special color or contrast controlling procedures at an additional charge. Retouching is charged by the hour. Prints from negatives require an interpositive.

EXHIBITION and REPRODUCTION QUALITY PRINTS:

Normal spotting with Ilfochrome dyes is included. The first print price includes silver masking for contrast control. *Printing schedule* is by arrangement (rush charges may apply).

	<i>First print</i>	<i>Additional</i>	<i>10+</i>
8x10	\$285	\$90	\$80
11x14	300	110	98
16x20	310	135	120
20x24	330	150	135
20x30	400	190	175
24x30	525	250	225
30x40	675	350	310

For 25 or more prints from one transparency there is no first print charge. For reorders, or when contrast masking is not required, deduct \$35 from the first print price. Add 50% to print prices for ILFOCHROME Transparencies.

PRINTING POLICY: Print making is a subjective art. I will make a print that looks good to me, matches the instructions as closely as possible, and is technically correct. While ILFOCHROME is the best print material available, some colors may not reproduce exactly as in the transparency. If any print needs to be redone due to changes in the instructions or the subjective interpretations of the client, there will be an additional charge.

LIABILITY: All photographic materials are handled with extreme care. In the unlikely event of loss or damage, Michael Wilder assumes no liability except for the value of the unexposed material.
